

CORE COMPETENCIES

- PRODUCT REVERSE ENGINEERING
- PART INSPECTIONS, CAPABILITY STUDY, GR & R STUDY, FIXTURE CERTIFICATION, SMALL & FULL VEHICLE VALIDATION
- DESIGN AND BUILD CUSTOM TOOLS, FIXTURES, AND MACHINES
- 5 AXIS CNC MILLING AND TURNING
- DIMENSIONAL FIXTURE VALIDATION; ATTRIBUTE, VARIABLE, SPC GAGING, SIGHT CHECK GAGE
- SECONDARY EQUIPMENT, STAND ALONE, AUTOMATION EQUIPMENT, ASM AIDS, AUTOMATED INSPECTION
- CAD/UG/CATIA/IGES/GDM 3D SOLIDS/CUSTOMIZED DATA REPORTS

COMPANY BACKGROUND

Since 1986, Spec Technologies, Inc. has provided team-oriented design and build services to the Automotive, Aerospace, Aircraft, and government communities. Our 55,000 sq. ft. of operating space located in Shelby Township, MI, is dedicated to design and build fixtures, secondary machines, specialty tools, and low volume production. Additionally, with our full-service dimensional service lab, we can assist you with Part Inspection, Capability Studies, GR & R Studies, Fixture Certifications, and small to full vehicle validations.

Our unique and dedicated program management team provides precise attention to detail, ingenuity, and pioneering methods to solve your needs. Our engineering team is affluent in; CAD modeling, Unigraphics, GDM 3D Solids, Catia, IGES, design review for manufacturability, as well as limited research and test engineering capabilities for your products. Also, combined with our CMM testing lab experts, our engineers have a unique skill set to reverse engineer many products/parts.
